XXL

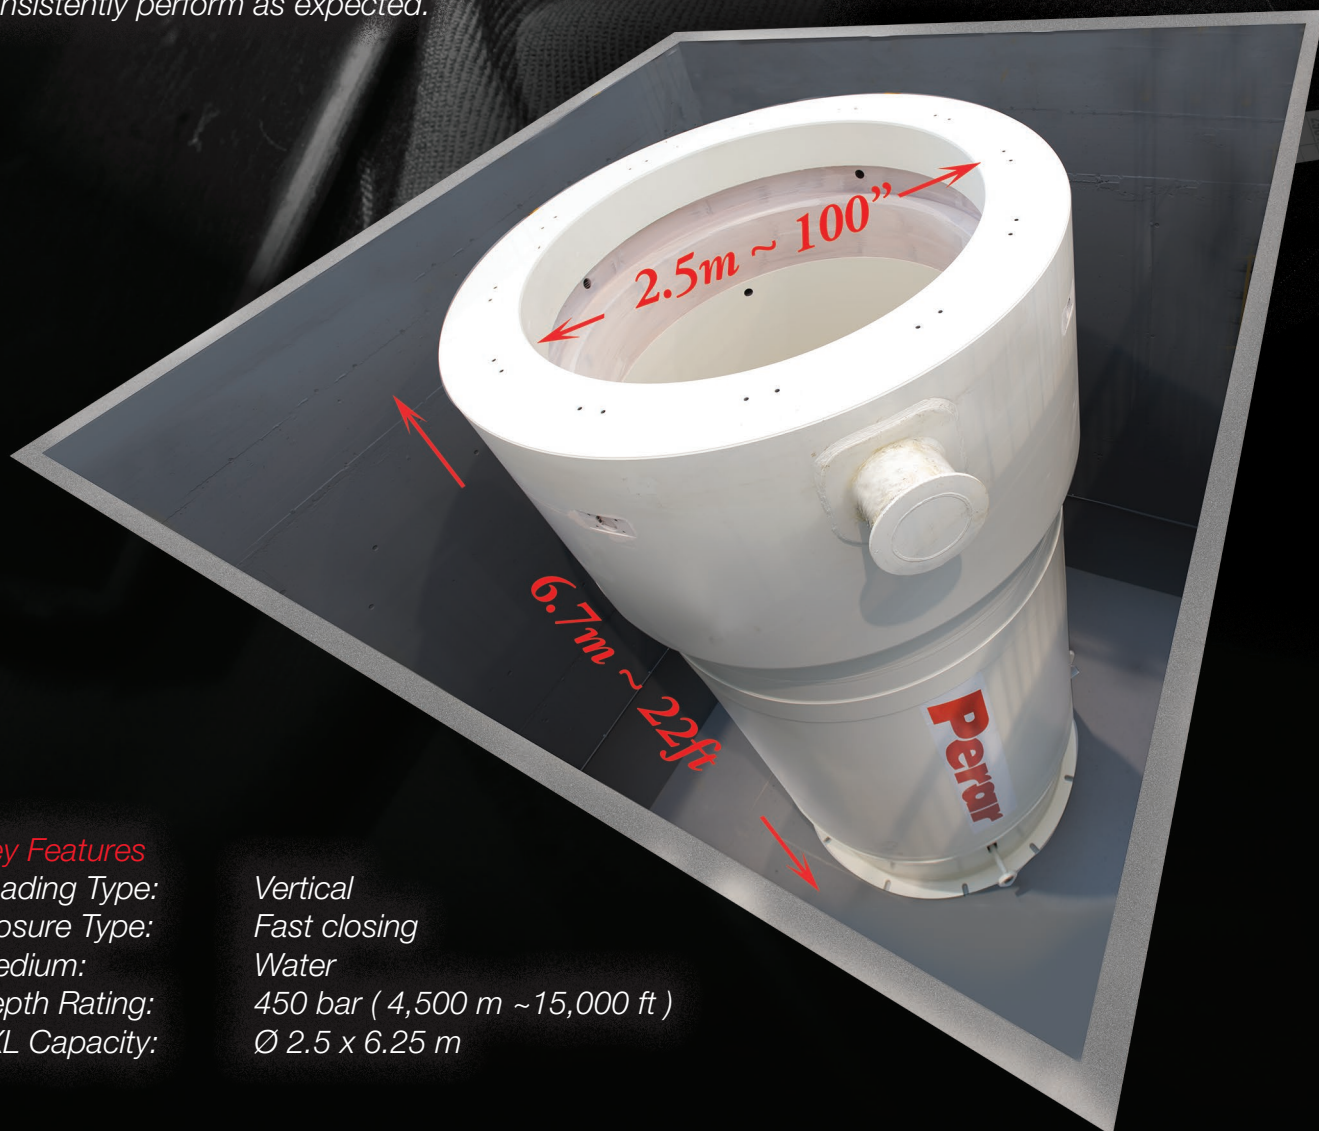

Ultra-Deepwater Hyperbaric Testing

15,000 ft ~ 4,500 m Depth simulation

As part of our deep commitment to deliver subsea products that meet the highest level of quality and reliability, the jumbo ultra-deepwater hyperbaric chamber is the latest addition to Perar's extensive investment program. Perar continues to pioneer much of the advanced subsea technology in the industry to help you meet the ever-changing challenges you face and keep you in control.

The state-of-the-art ultra-deepwater pressure vessel efficiently simulates external subsea conditions at project installation depth down to 15,000 ft ~4,500 m water depth.

All to ensure that Perar subsea valves and actuators, manufactured from a single source, will consistently perform as expected.

Key Features

Loading Type:	Vertical
Closure Type:	Fast closing
Medium:	Water
Depth Rating:	450 bar (4,500 m ~15,000 ft)
XXL Capacity:	Ø 2.5 x 6.25 m
